

Audience Polling System Specification

The Audience Polling System shall consist of modules equipped with four lighted buttons at each of the theater's seats.

The voting modules shall use arcade-quality buttons, and be connectorized for easy field replacement.

The Audience Polling System shall be capable of processing all seats in the theater within one half second.

Results shall be displayed on a scrolling sign or superimposed over the theatre video screen.

Voting results shall seamlessly affect the course of the presentation.
