Lock Up Your Show!

Now you can synchronize your shows using the Alcorn McBride SMPTE Machine. The SMPTE Machine connects to any of our show controller, allowing WinScript to program each of the controller's 256 sequences to be triggered at different timecodes.

The SMPTE Machine reads and generates SMPTE time code at all standard frame rates - 23.976, 24, 25, 29.97(drop and non-drop), and 30 fps. The SMPTE reader is immune to incoming SMPTE dropouts, and will continue to flywheel in the absence of external SMPTE, re-locking when the external time code is restored.

SMPTE inputs and outputs are 600 ohm transformer isolated. Status is displayed on front panel LEDs.

Get in sync! Call Alcorn McBride today.

- ***Reads and Generates SMPTE***
- ***WinScript Compatible***
- ***Corrects Dropouts***
- ***600 Ohm Balanced I/O***
- ***Supports All Common Frame Rates***
