

Audio Distribution Transformers

70 / 100 V Transformer Modules

XD4 Quad DIN Rail Module

XD1 Single Module

Applications

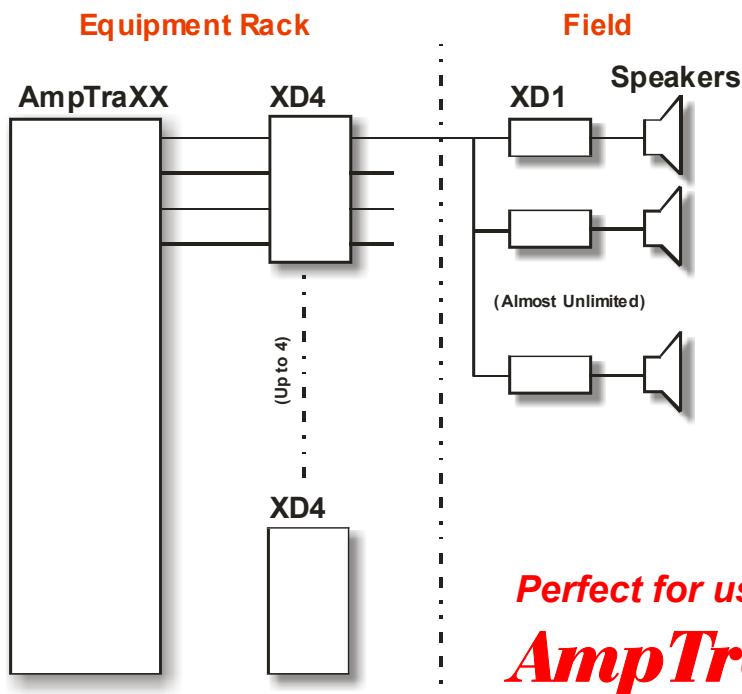

- BGM
- Paging
- Museums
- Restaurants

These handy transformer modules make audio distribution easy. They're available in single modules with corner mounting holes, or a quad unit that snaps onto a standard DIN rail.

Mount up to four of the XD4 quad modules on DIN rails in the same rack as your AmpTraXX (or other amplifier), and then mount XD1s around your facility near the speakers.

Each module has both 70 volt and 100 volt taps.

	XD1 Single Module	XD4 Quad Module
Channels	1	4
Mounting	4 Corner Holes	Snaps Onto DIN Rail
Input	8 Ohm	8 Ohm
Outputs	70V, 100V	70V, 100V
Watts	50W	50W
Size	2.1" x 4.3" x 2" 53 x 109 x 51 mm	8.6" x 4.7" x 2.7" 218 x 119 x 69 mm
Weight	1.3 lb 600 g	5.2 lb 2.4 Kg

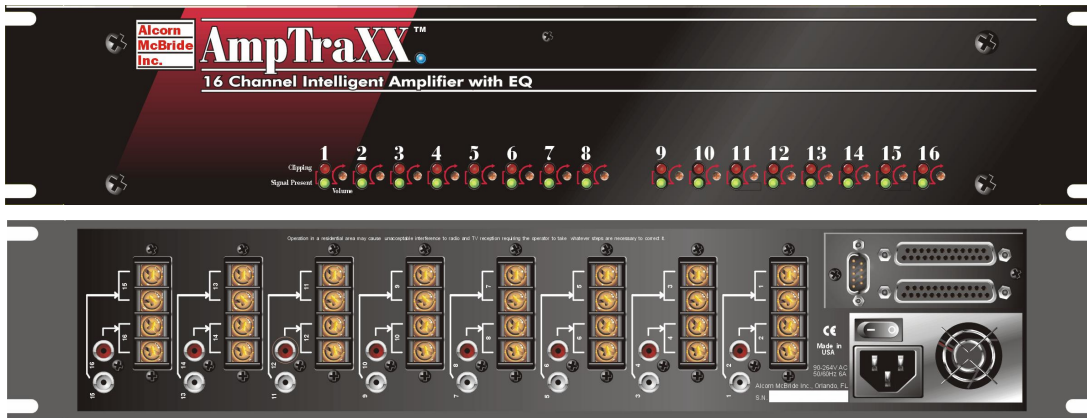

Perfect for use with
AmpTraXX™

AmpTraXX™

16 Channel Intelligent Amplifier

- 16 Channels x 20 Watts
- Volume and EQ Controls
- RS-232 Interface
- Tamper-Proof Settings
- Level and Peak LEDs
- RCA or Balanced Inputs
- Universal Power Supply

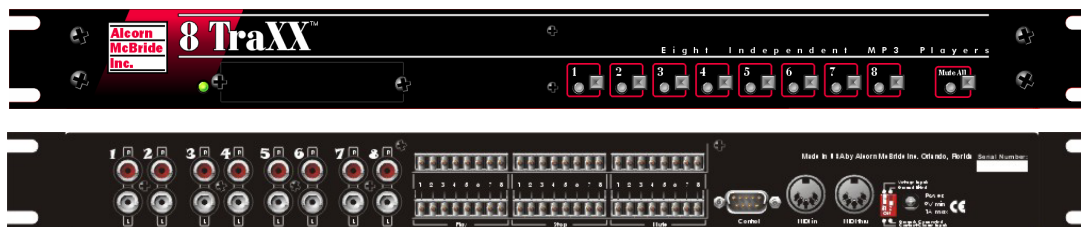

AmpTraXX gives you sixteen channels of amplification and EQ in just two units of rack space. In many systems it eliminates the need for expensive EQ or DSP racks. It's a complete audio processing and distribution system in a single box.

AmpTraXX is programmed using easy-to-understand, graphical Windows software included with each unit. Setup is as simple: select which filter you want on a particular channel, then move the sliders up and down to set gain, cutoff frequency, and filter Q. Settings are permanently stored in AmpTraXX's memory. You can also change setting on the fly.

8-TraXX™

16 Channel Audio Repeater

Applications

- Theme Parks
- Museums
- Retail Stores
- Restaurants
- Transportation
- Multi-Lingual
- Residential

- 8 Independent Stereo Audio Channels
- High-quality MP3 Audio Format
- Compact Flash Media Included
- Voltage or Contact Closure Control
- Start, Stop and Mute Each Track
- RS-232 and MIDI Control

8TraXX lets you play eight independent stereo tracks from a single, economical rack-mount unit. It's perfect for dark rides, museums, and interactive displays. Each track is individually triggered by its own discrete input – contact closure or voltage – allowing direct connection to proximity sensors or switches. Or all tracks can be controlled from a single RS-232 serial or MIDI port.

8TraXX offers the latest in Digital Audio Repeater technology, combining MP3 audio with Compact Flash for a rugged, reliable, maintenance-free solution to your playback needs. Access time is nearly instantaneous! All eight tracks are completely independent, and offer superb audio quality. Standard play-back time is 20 minutes total. Larger Compact Flash media can provide several hours of playback!
